</table>

NOTES: * Current use refers to use of substance in the 30 days prior to administration of the survey.

Unweighted n's are presented above; prevalence estimates in the body of the table are based on weighted data.

The MAS Report does not provide the standard errors around these observations; therefore, caution should be exercised in interpreting any changes in drug use over time.

SOURCE: Adapted by the Center for Substance Abuse Research (CESAR) from the 2001 and 2002 Maryland Adolescent Survey (MAS) Reports, Maryland State Department of Education (MSDE).
