Other	0.4%	0.2%	0.3%	0.5%	0.9%	0.1%	0.1%	0.1%	0.1%	0.2%	0.1%	0.1%	0.1%	0.2%	0.3%

**NOTES:** \*Individuals who are in treatment for an alcohol/drug-related problem resulting from their own substance use (primary clients) are included in the admissions figures in this table. Non-primary clients, such as family members or significant others of an active primary client, who are seeking treatment services due to problems arising from their relationship with the primary client are excluded from the admissions figures. Please note that tables previously posted on this web site included non-primary clients. \*\*Treatment clients are screened at intake to determine their major substance of abuse. Each client's primary, secondary, and tertiary drugs of abuse are reported to SAMIS. Since each admission may have up to three drug mentions associated with it, percentages will not add up to 100%. \*\*\*ADAA's definitions of substances can be found in Notes on Substance Abuse Indicators at: <http://www.dewsonline.org/dews/county/notes.asp>. SAMIS data was generated by ADAA staff on August 24, 2004, and August 27, 2004. Census 2000 data was generated by CESAR Staff using American FactFinder (<[http://factfinder.census.gov/servlet/CTGeoSearchByListServlet?ds\\_name=DEC\\_2000\\_SF1\\_U&en&\\_ts=110277169890](http://factfinder.census.gov/servlet/CTGeoSearchByListServlet?ds_name=DEC_2000_SF1_U&en&_ts=110277169890)>) on August 10, 2004.

**SOURCE:** Adapted by CESAR from data from the Substance Abuse Management Information System (SAMIS), Maryland Alcohol and Drug Abuse Administration (ADAA), Department of Health and Mental Hygiene (DHMH) and U.S. Census Bureau.
